EXPOSURE & STRATEGIES

Geographic strategy exposure is difficult to quantify at any one time in the Pool due to sub-advised strategies, but currently there is approximately 27% exposure to USA, 7% to global markets, and the rest in Canada.

Foreign currency exposures may be hedged using strategies at the Pool or sub-advisor level. The Pool does not take a strong view on currency and will tend to not fully hedge its exposures as is appropriate for a mid-to-long-term equity mandate.
